

Take control

of the \$375 million portable air cleaner business.

Introducing the newest whole-home media air cleaner from Aprilaire.

Take your share of the portable air with the all-new

Your customers live in more than one room of their home.
Yet they rely on a single room air cleaner.

The portable air cleaner market is booming.

Homeowners are paying anywhere from \$100 up to \$700—and even more—per unit.

The problem is, portable air cleaners filter only one room at a time. If they want the effects of clean air throughout their home, they'd have to buy one for every room. And that can add up fast.

And what a nuisance!

Many people turn to high-efficiency furnace filters to help solve their problem. But as you well know, they only trap the very largest of allergens, dust and other contaminants.

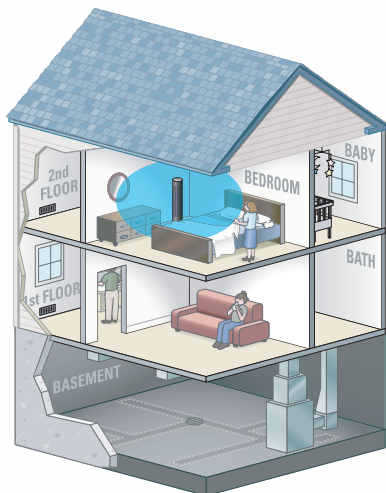

**Homeowners are relying on you
to provide them with a better solution.**

Thankfully, there *is* a better solution.

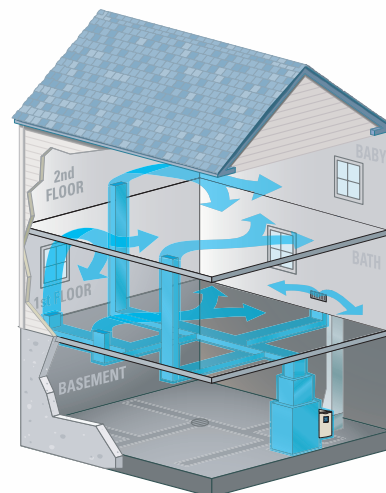

The new Aprilaire whole-home air cleaner gives you the opportunity to take a greater share of the high-efficiency filter and portable air cleaner market with a product that is superior at removing more

particles — *throughout every room of the home.* In addition, by installing a whole-home unit, you create a customer for life with ongoing maintenance business.

A portable unit filters the air in just one room. To get the ultimate health and comfort benefits from a portable, homeowners would have to purchase one for every room in their home.

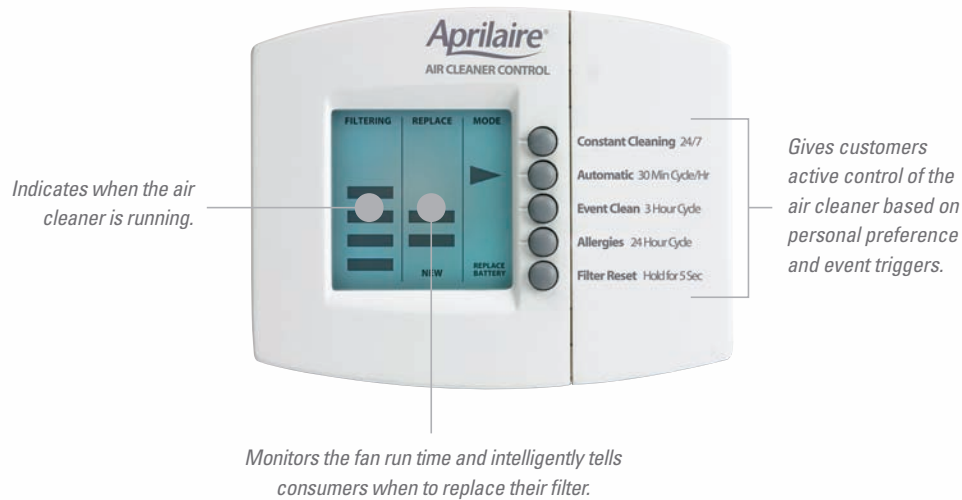

A better, more convenient solution is to install an Aprilaire whole-home air cleaner. As part of the home's central heating and cooling system, it mounts away from the living space and operates silently.

cleaner and 1" filter market whole-home solution from Aprilaire.

The Aprilaire 4000 series media air cleaner combines whole-home efficiency with the convenience of visible, active control.

Historically, whole-home air cleaners have waited passively for a heating or cooling call to clean the air. Other than turning the blower on and off, there wasn't a way for homeowners to actively control the blower. Market research confirmed that this was a huge opportunity for a new whole-home air cleaning product — one that offered better performance along with the visibility and control offered by portables.

To help you get a bigger share of the air cleaner market, the new Aprilaire Model 4000 comes equipped with the industry's only patented Air Cleaner Control. It can be installed either on the unit or in the living space to allow greater visibility and active control — providing your customers the ultimate in comfort and confidence.

Active control, more features and an all-new patented media design make the Model 4000 the newest innovation in whole-home air cleaning.

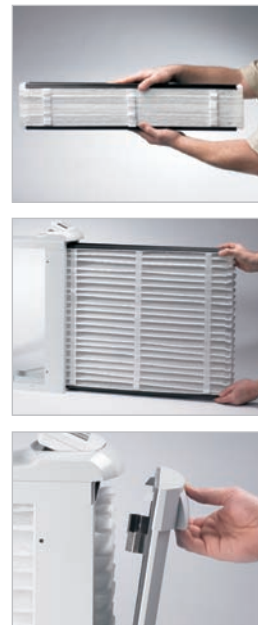

Model 4200

Model 4400

- Collapsible media with automatic pleat spacing installs in seconds. A MERV 13 rating means that the media is excellent at removing even the smallest micron-sized particles.

- Installation is simple. Just place the media in the top and bottom rails and slide in, faster than a cake box.
- Patented media design protects your replacement business.
- Narrower 6.75" cabinet for easier installations and more flexible applications.

- SelfSeal™ dramatically reduces air bypass, improving filtering performance.
- Self-aligning door easily snaps into place every time.

Control mounts in living space or on unit.

Particle size in microns	Model 4200/4400 Filtration Efficiency					
	1	3	5	7	10	MERV
Percent removed	76%	93%	91%	93%	97%	13

Recommended air flow is up to 2000 cfm.

Agency Approvals: Underwriters Laboratory Listed Class 2 Air Cleaner Cabinet – Supports 400 lb. static load, constructed of galvanealed 22 gauge steel

Door – Galvanealed 22 gauge steel

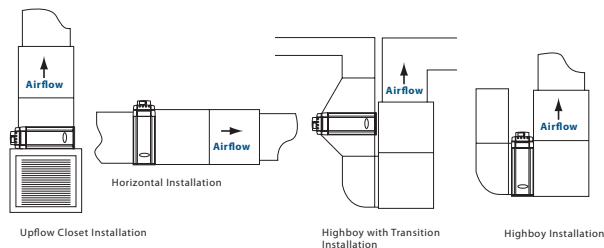

Warranty – 5 year limited warranty

Filter Life – one to two years

Airflow (cfm)	Airflow Resistance ("wc)							
	600	800	1000	1200	1400	1600	1800	2000
4200	.06	.09	.12	.16	.20	.25	.30	.35
4400	.06	.09	.12	.17	.22	.26	.31	.37

Use the same sheet metal transitions used for the 2200/2400.
